2013 Preqin Consistent Performers in Private Equity Report

Consistent Performing Fund Managers

We analyze the most consistent performing fund managers for buyout, venture capital and fund of funds vehicles.

Top Performing Funds: By Strategy

We look at the best performing private equity funds across the following strategies: buyout, venture capital and fund of funds.

Top Performing Funds: By Geography

We also explore the top performing North America-, Europe- and Asia-focused funds.

Funds to Watch

We examine funds that, based on current data, may potentially generate high returns in the future, with a focus on funds of funds, buyout funds and venture capital funds.

Foreword

The private equity industry has been in a state of healthy recovery since the financial crisis, with indications of performance rebounding. However, while private equity investments can offer long-term rewards to investors, there is a significant spread between the performance of individual funds, with a particularly large gulf between returns generated by the best and worst performing funds. There is clear evidence to suggest that managers of top-tier funds are more likely than their peers to continue to produce top-performing funds in the future; however, we must note that past performance is not a guarantee of future success. While 16% of managers of bottom quartile funds subsequently improve and manage top quartile successor funds, many more do not, which emphasizes the need to judge each fund on its own individual merits.

Private equity as an industry is known for its lack of transparency and this makes finding consistent performing fund managers no easy task. Despite improvements made in the level of disclosure across the private equity space, it remains challenging for LPs and GPs to access the reliable, accurate and fully transparent data necessary to effectively benchmark funds.

Consistent Performers in Private Equity is a new report from Preqin, showing an excerpt of data featured in the **2013 Preqin Private Equity Performance Monitor**, focusing on a selection of tables showing: consistent performing managers, top performing funds and funds to watch. The ability to identify, evaluate and select these top performing funds is of paramount concern to investors in private equity. By providing access to transparent and accurate fund-by-fund returns data for over 6,300 private equity funds, representing 70% of the total capital raised by the industry, Preqin can assist in this challenging task.

We hope you find this report useful, and welcome any feedback you may have. For more information, please visit www.preqin.com or contact info@preqin.com.

Consistent Performing Fund Managers: Buyout

For long-term investors in private equity, consistent performance across multiple funds in a series is a very important trait. Analysis of track record is a key component of an investor's due diligence process. It is important to note that while past success is no guarantee of future returns, Preqin's analysis in the **2013 Preqin Private Equity Performance Monitor** indicates that the majority of managers with top quartile performing funds have gone on to produce returns that beat the median benchmark with the next fund in their series.

This section analyzes the most consistent performing fund managers for buyout, venture capital and fund of funds vehicles. The purposes of these tables is to illustrate the fund managers that have performed consistently and in no way does it endorse the fund managers listed.

The league tables of consistent performers are compiled using only the funds for which Preqin has performance data and has assigned a quartile ranking. 2011, 2012 and 2013 vintage funds have been excluded as these funds are too early in their fund lives to generate a meaningful

IRR. The lists are restricted to active fund managers that have raised at least three funds of a similar strategy, and have either raised a fund in the past six years or are currently raising a fund of a similar strategy to their predecessor fund.

Preqin assigns quartile rankings to private equity funds based on both the multiple and IRR, taking into account the fund vintage, strategy and geographic focus. Top quartile funds are given a score of one, second quartile funds are given a score of two, and so on. An average quartile ranking is then calculated.

Top Performing Funds: Buyout and Venture Capital

The tables listed in this section provide information on the best performing private equity funds of the following strategies: buyout funds, venture capital and fund of funds. Also included are the top performing North America, Europe and Asia-focused funds.

A minimum fund size was imposed, as indicated on the tables. In this section, the lists consist of funds with a vintage of 2006 – 2010. Only funds that have called up at least 50% of their commitments are included and the IRR is used as the key determinant of performance.

Data Source:

Preqin's [Performance Analyst](#) has detailed performance data on over 6,300 private equity funds.

Funds to Watch

This section provides an analysis of returns data for funds of more recent 2011, 2012 and 2013 vintages. These are funds that, based on current data, may potentially generate high returns in the future. It should be noted that these lists are subject to change as the constituent

funds mature and more performance information is gathered. In this instance, the fund multiple is used as the key measure of performance; however, we also added the stipulation that the funds must have drawn down at least 20% of their capital.

A minimum fund size was imposed, as indicated on the tables. In this section, the lists consist of funds with a vintage of 2011 – 2013.

Fig. 10: Top Five Best Performing Buyout Funds (Fund Size \$500mn+, Vintage 2011 - 2013)

Rank	Fund	Firm	Vintage	Fund Size (mn)	Type	Region Focus	Called (%)	Distributed (%) DPI	Value (%) RVPI	Multiple (X)	Net IRR (%)	Date Reported

2013 Preqin Consistent Performers in Private Equity Report

Preqin's Private Equity Performance Products offer the most up-to-date and transparent fund performance data and comparative tools available in the industry.

Our Performance Data

We hold performance data on over 6,300 private equity funds, including buyout, venture capital, real estate, infrastructure, distressed private equity and more. In terms of aggregate value, this represents 70% of all capital ever raised.

Sourced through a combination of direct contact with both fund managers and investors, and regulatory filings and FOIA requests, our performance data is meticulously cross-checked and examined by our dedicated research team.

This high level of global coverage enables us to produce the most meaningful benchmarking and comparative tools available in the industry.

Performance Analyst

Performance Analyst is the industry's most extensive source of net-to-LP private equity fund performance, with full metrics for **over 6,300 named vehicles**.

With Performance Analyst, you can:

- Compare performance for funds of all types.
- Assess a firm's historical track record by quartile performance.
- Download performance data to Excel for advanced data analysis.
- View past performance for specific managers against their peer groups.
- View median, pool, weighted and average benchmarks.
- Gain further understanding of the latest trends in the industry.
